

SMART Data Protection app for Microsoft Dynamics 365 Business Central helps you to be compliant with the main rules of the GDPR and CCPA regarding deletion and anonymization of data.

The app allows you to manage these aspects of the regulation:

Data erasure

Data anonymization

GDPR request Log

FEATURES AND BENEFITS:

Flexible setup for tables, relations and dates

Logging of completed operations

Date formula is used to calculate event date

Can be used for all tables

Preview of data to be processed

WHO NEEDS SMART DATA PROTECTION APP?

If your company has customers, you need mechanisms to protect personal data. There are hundreds of data protection laws around the world.

The GDPR (for citizens and residents of the EU) and CCPA (for California residents) are considered among the most stringent ones. They apply to organizations that process such data, **whether they are EU/California organizations or not.**
