## 2. SMART Batch Fixed Asset Accounting upgrades

The upgrade includes the following improvements, new functional capabilities, and error fixes:

Country code	ID	Content	Functional area	Type of change
<b>CORE</b>	#91181	An error that occurred during preview posting when creating Low-Value FA (child) has been fixed.	SMART Batch FA	Bugfix
<b>CORE</b>	#95828	The ability to re-commission a Low-Value FA (child) when the previous commissioning entry was canceled has been added.	SMART Batch FA	New feature

### 3. SMART IFRS16 Leasing upgrades

The upgrade includes the following improvements, new functional capabilities, and error fixes:

Country code	ID	Content	Functional area	Type of change
<b>CORE</b>	#89073	Functionality has been added to update the Depreciation Ending Date on the fixed asset card in cases where the Leasing End Date has changed.	SMART IFRS16 Leasing	New feature
<b>CORE</b>	#89988	Formation of Leasing Calculation in case of incomplete month of lease has been fixed. The last month of the Leasing Calculation is formed according to the Expected Leasing Duration (fractional part).	SMART IFRS16 Leasing	Bugfix
<b>CORE</b>	#92084	Calculation of Usage Rights for a period in which there are no changes to Lease Terms has been fixed. Journal lines are not created now. Before the update, financial journal lines were created with amounts of 0.	SMART IFRS16 Leasing	Bugfix
<b>CORE</b>	#92674	The calculation of the book value of a leased asset when lease terms have been changed has been fixed: it is now calculated as the difference between the values of the Liabilities Balance Debt Beginning of the current period and the Balance Debt Ending of the previous closed period to correctly calculate Long-Term G/L Balance.	SMART IFRS16 Leasing	Bugfix

## 4. SMART Cash Flow upgrades

The upgrade includes the following improvements, new functional capabilities, and error fixes:

Country code	ID	Content	Functional area	Type of change
<b>CORE</b>	#89403	The functionality for generating schedules and contract payable/receivable plan entry has been expanded for invoice posting on partial shipments and receipts by order.	SMART CashFlow	New feature
<b>CORE</b>	#90891	An issue has been fixed where the Cash Flow Date was not updated when using the "Suggest Worksheet Lines" page and filling in the "Override Cash Flow Date" field for entries with the Purchase Order and Sales Order source types.	SMART CashFlow	Bugfix
<b>CORE</b>	#90469	A "Suggest released documents only" toggle has been added to the Cash Flow Forecast card. When enabled, it allows the system to generate Cash Flow Worksheet lines based on unposted purchase/sales documents with the "Released" or "Pending prepayment" statuses, provided that the payment plan is not filled in on the agreement card or the vendor/customer card. If the toggle is disabled, the system generates journal lines for documents with all statuses.	SMART CashFlow	New feature
<b>CORE</b>	#90892	A new "Manually Split" flag has been added to the Cash Flow Entries ledger. For entries where this flag is set to "Yes", data updates are blocked.	SMART CashFlow	New feature

## 5. SMART Payroll Connector for HiBob upgrades

The upgrade includes the following improvements, new functional capabilities, and error fixes:

Country code	ID	Content	Functional area	Type of change
<b>CORE</b>	#90824	<p>For the SMART Payroll HRIS Integration Core application, new processes have been created and the functionality of existing ones has been expanded, specifically:</p> <ul style="list-style-type: none"> <li>• Personal Information: New fields have been added to the HRIS Employee card under the General section: Family Status Type, Native Language, Citizenship Country/Region Code</li> <li>• Person Document Information: New fields have been added to the HRIS Employee card under the Document section: Person Document Type, Document Valid Until Date</li> <li>• Address Information: New fields have been added to the HRIS Employee card under the Address section: County, Administrative Category, Street, House, Building, Apartment</li> <li>• Relative Information: A new Employee Relatives block has been created, which allows the integration of relative information from an external system. Additionally, a new process has been created to create and update relative data in the</li> </ul>	SMART Payroll Connector for HiBob	New feature

		<p>standard Person Relatives reference table.</p> <ul style="list-style-type: none"><li>• Fact Address Information: A new Fact Address block has been added to the HRIS Employee card, allowing the integration of data about the employee's permanent address from an external system. A new process has also been created to create and update permanent address data for the person.</li><li>• Disability Information: A new Disability block has been added to the HRIS Employee card, which allows the integration of disability information from an external system. A new process has been created to create and update disability data in the Person Medical Info records, and, in case of disability after the employee's hire, the employee is transferred to a position with a disability indicator.</li><li>• Employment Information: New fields have been added to the HRIS Employee card under the Work section: Manager Code, Probation Period Completion, Probation Period Formula</li><li>• Rehiring: A new field Rehiring has been added to the HRIS Employee card under the Work section, which should be filled in if an employee</li></ul>		
--	--	---	--	--

		who was previously terminated is rehired. A new process for rehiring employees who were previously terminated has also been created.

## 6. SMART WHT for Georgia upgrades

The upgrade includes the following improvements, new functional capabilities, and error fixes:

Country code	ID	Content	Functional area	Type of change
<b>GE</b>	#55791	Clarity and accuracy when reviewing WHT entries created in non-local currencies has been improved.	SMART WHT for Georgia	New feature
<b>GE</b>	#76676	WHT is now calculated and posted per invoice based on the Amount to Apply, ensuring correct WHT, G/L, and Vendor Ledger Entries when a single payment is applied to multiple invoices.	SMART WHT for Georgia	New feature
<b>GE</b>	#90858	WHT and PF revaluations are now calculated per invoice using each invoice's exchange rate, ensuring correct posting when a single payment is applied to multiple invoices.	SMART WHT for Georgia	Bugfix
<b>GE</b>	#91046	An issue has been fixed where WHT Original Amount and Original Base showed the full invoice amount instead of the partial payment amount when unapplying automatically applied bank payments.	SMART WHT for Georgia	Bugfix

## 7. SMART FX Rates

The upgrade includes the following improvements, new functional capabilities, and error fixes:

Country code	ID	Content	Functional area	Type of change
<b>CORE</b>	#89418	<p>A new solution, SMART FX Rates, has been released to automate exchange rate updates in Business Central, reduce manual effort for finance teams, and ensure consistent financial data in multi-currency environments.</p> <p>SMART FX Rates provides seamless integration with external data providers and supports importing exchange rates directly from sources offering open APIs — including the European Central Bank (ECB), OANDA, and other compatible providers. This ensures consistent and up-to-date currency data across the entire system without the need for manual intervention.</p>	SMART FX Rates	New feature

## 8. Procedure for system upgrade

System upgrade consists of the two stages:

- Code upgrade
- Data upgrade

Code upgrade refers to migration of changes in objects from the release to the customer base performed through the text merge of two versions.

Data upgrade refers to changing the existing data in case a new release changes the data scheme, or in case of new settings. Existing data is changed automatically during code upgrade at the moment when the Data Upgrade procedure starts. Setup of new modules is performed manually.

## 9. Terms and conditions for SMART Localization upgrade

1. SMART business (hereinafter referred to as "the Company") develops and upgrades the SMART Localization solution (hereinafter referred to as "the Solution") in accordance with the requirements and limitations defined in the Microsoft Dynamics Partner Localization and Translation Licensing Program (PLLP).
2. On the first workday of each quarter, the Company publishes the Solution upgrades. Subsequently, the Company reserves the right to change the frequency of releasing upgrades.
3. The Solution upgrades are provided to the Company's customers with active subscription on the free-of-charge basis for all Microsoft Dynamics NAV and Microsoft Dynamics 365 Business Central product versions that are at the stage of the basic Microsoft support period. To check the software product lifecycle, go to <https://support.microsoft.com/en-us/lifecycle/search>.
4. The customer system is upgraded upon prior coordination of the upgrade schedule, as well as scope of works on migrating upgrades to the customer systems, including the upgrade of settings and system testing, and shall be performed not later than the next upgrade is released. The estimated upgrade release schedule is once per 3 months. Upgrade can be postponed by 3 months upon prior mutual agreement.
5. The possibility of upgrading the system independently by the customer is also provided for. To this end, the Company shall provide the upgrades, including the recommendations on updating settings and scripts for upgrading data. However, it should be noted that customer modifications of the system may be incompatible with the source code of the received upgrade, and, as a consequence, the upgrade or executed modifications of the system will have to be adjusted.
6. The Company shall fix the Solution errors on the free-of-charge basis for customers with active subscriptions and those performing regular upgrades in accordance with c. 4.
7. The Company shall provide a detailed description of the changes in each upgrade and publish it not later than the date of the upgrade release.
8. Out-of-band updates in the legislation or out-of-band error fixes are provided to the customers regardless of the frequency of upgrade releases.
9. Upgrading the Solution in full or its selected functionality for the "legacy" system versions that are not part of the basic Microsoft support period in accordance with c. 3 or for customers with no active subscription shall be performed by the Company with due allowance to the fact that such upgrade is developed specifically for such customer and, as a result, may be provided to such customer on a paid basis.
10. Any deviation from these terms and conditions shall be documented in a form of agreement; otherwise, these terms and conditions apply.
